AVZ404 (4CH)

AVZ408 (8CH)

AVZ416 (16CH)

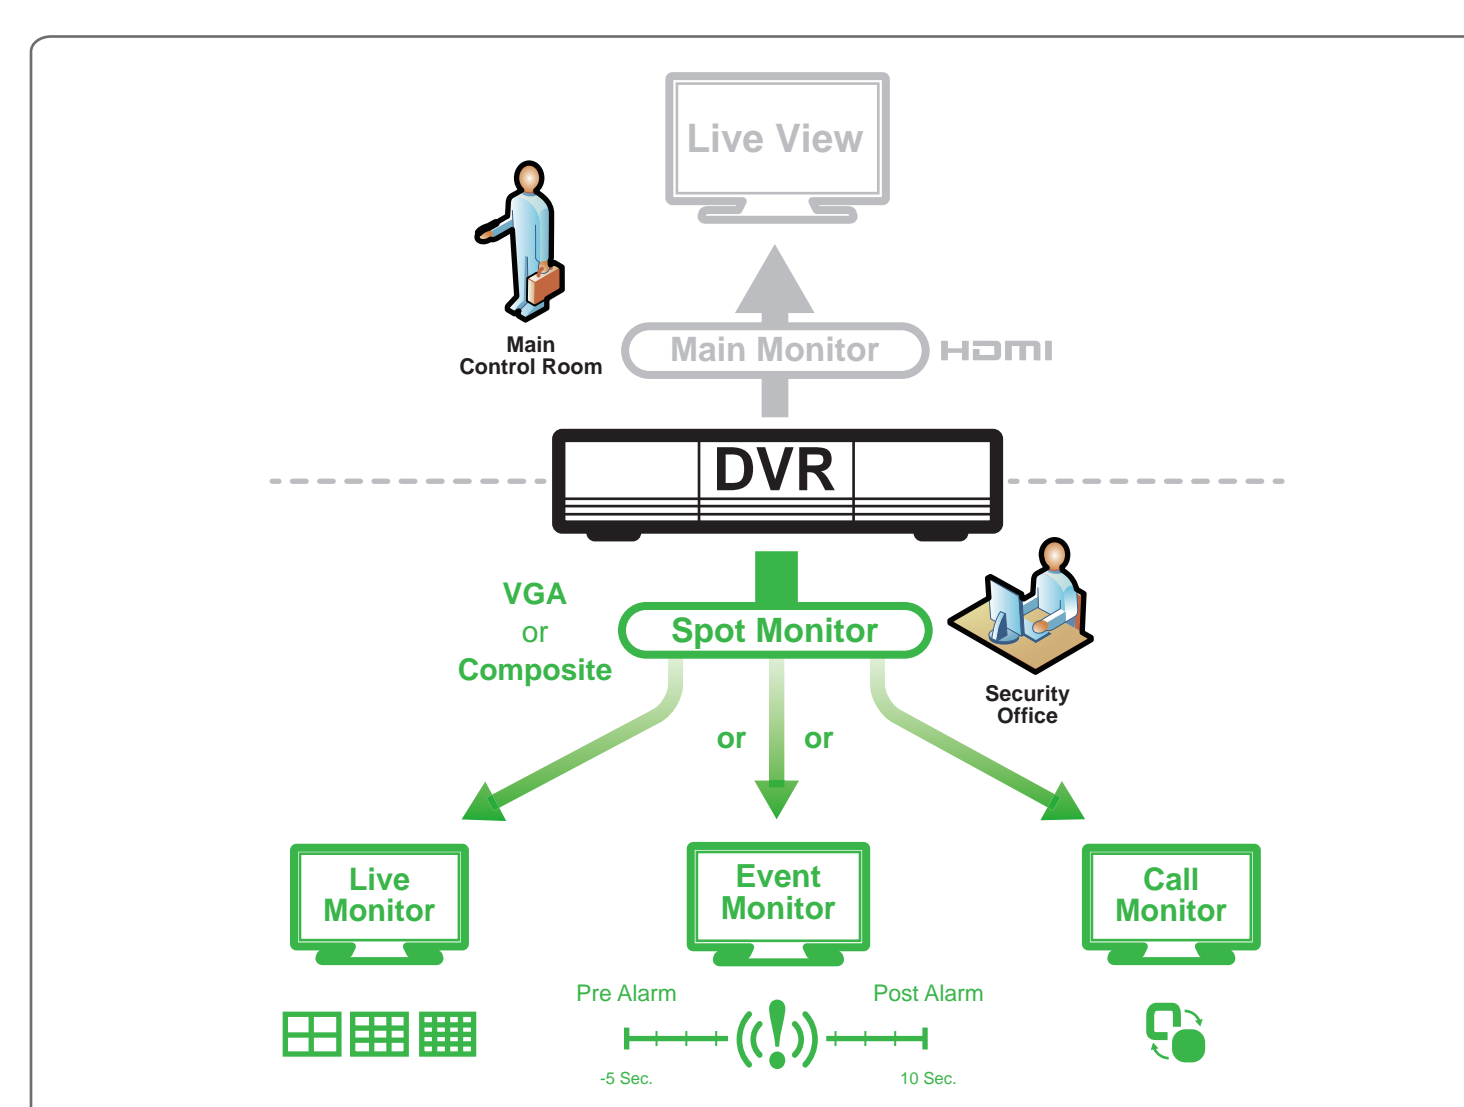

AVZ8032 (32CH, 8 bay HDD)

4K/2K Performance

To get superb image resolution and quality, this DVR series is compatible with 3MP / 5MP IP cameras and supports 3MP / 5MP video recording (30fps@3MP / 15fps@5MP).

Spot Monitor

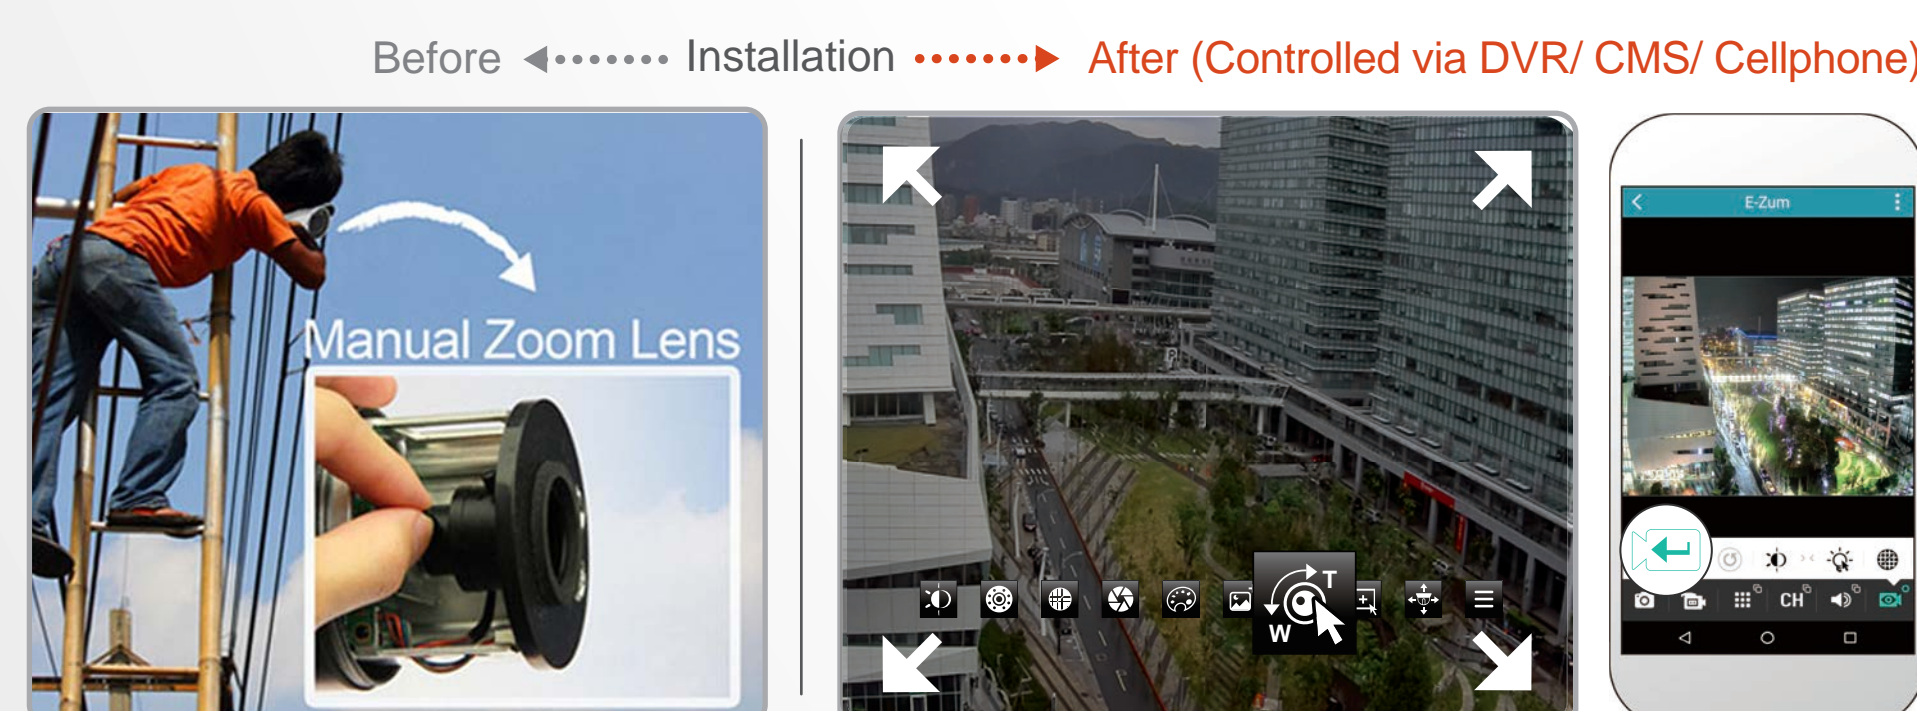

In addition to the main display via the HDMI output, you can also assign a secondary display to show live view, call monitor or event monitor via the VGA or composite output.

Quadbrid HD CCTV DVR

The quadbrid HD CCTV DVR accepts IP, TVI, Analog HD and 960H video signals for up to 2MP (IP up to 5MP) live display and video recording. The video channels which support IP cameras are four for AVZ404, and nine for AVZ408 and AVZ416. It breaks the boundaries of different video systems and enhance the flexibility for system integration.

Ezum™ Installation

The best advantage of the Ezum™ series is that all you need to do is to finish camera installation and aim the camera at where it's supposed to monitor. The focal length and focus adjustments could be done remotely on DVR, PC CMS software, and the mobile app "EagleEyes" with the user-friendly control icons.

Starlight Technology

This camera is equipped with starlight technology, allowing you to see color video with more details at night, even in the environment with a glimmer of light.

New Playback UI Design

This DVR series is all capable of full-channel real-time recording to capture fluent images, and it's getting even easier to search those videos with the new playback panel. All filter options are laid in one interface for you to quickly select and find the time segment with recordings.
