4K/2K Performance
### Show You Vivid & Clear Detail

To get superb image resolution and quality, this DVR series is compatible with 3MP / 5MP IP cameras and supports 3MP / 5MP video recording (30fps@3MP / 15fps@5MP).

Spot Monitor
### Simply See What You Want

In addition to the main display via the HDMI output, you can also assign a secondary display to show live view, call monitor or event monitor via the VGA or composite output.

Pentabrid HD CCTV XVR
Offers More Flexibility & Choices

The pentabrid HD CCTV XVR accepts IP,TVI, CVI, analog HD and 960H video signals for up to 2MP (IP up to 5MP) live display and video recording. It breaks the boundaries of different video systems and enhance the flexibility for system integration.
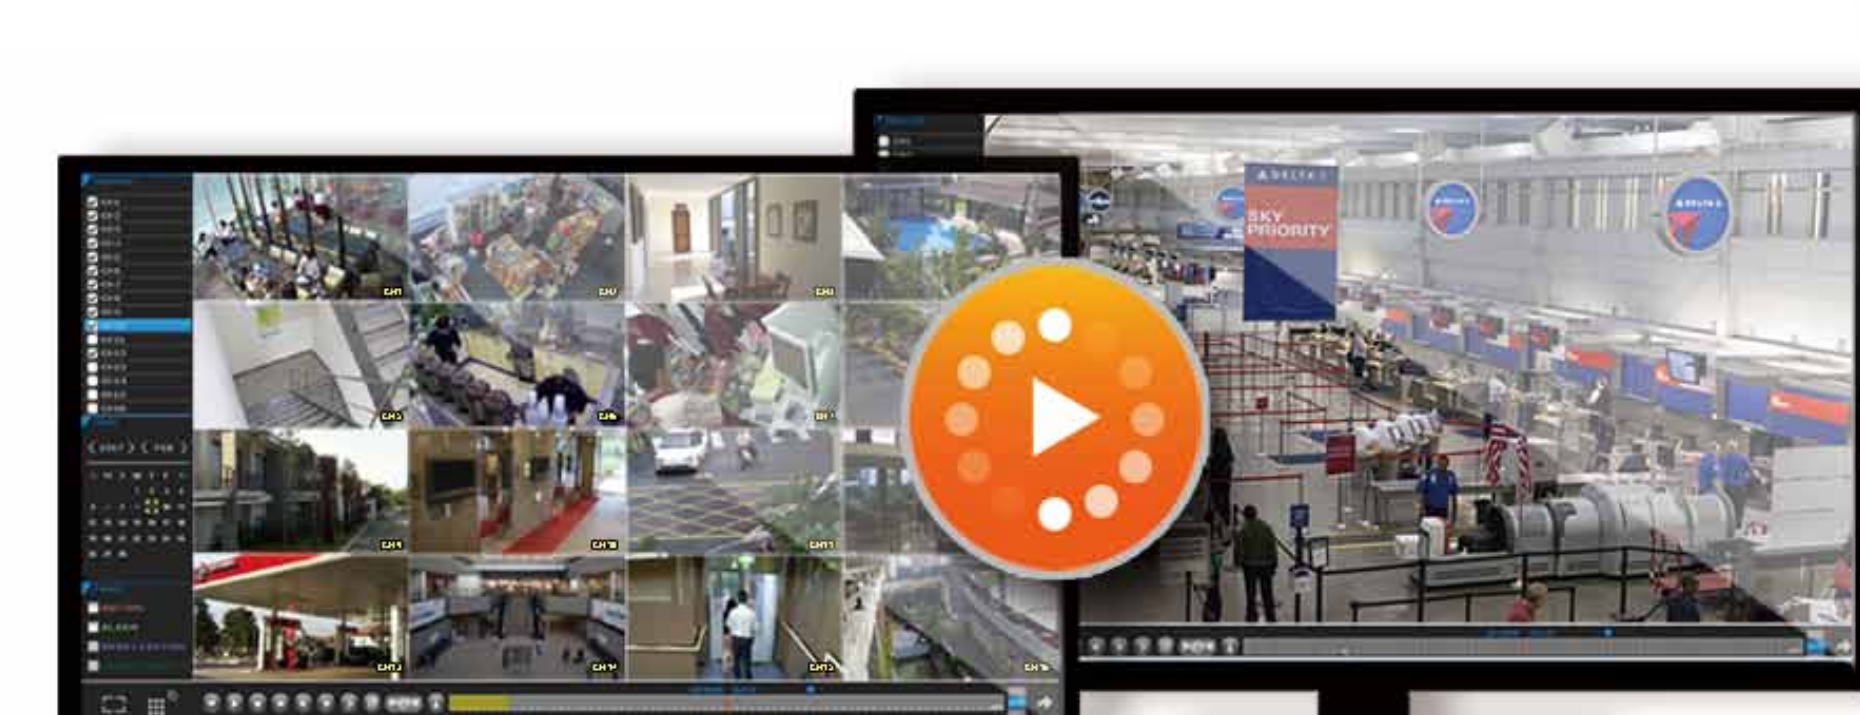

Ezum™ Installation
Motorized Zoom Lens

The best advantage of the Ezum™ series is that all you need to do is to finish camera installation and aim the camera at where it's supposed to monitor. The focal length and focus adjustments could be done remotely on DVR, PC CMS softawre, and the mobile app "EagleEyes" with the user-friendly control icons.

8-bay Storage
with Eco Power Saving Mechanism

To solve the large storage requirement of 4K2K recording, this NVR supports up to 8 hard disks to keep high quality video data without overwriting data so quickly. Hot-swapping design makes hard disk replacing or adding easy without shutting down the system. A power-saving mechanism is also adopted to reduce power consumption.

New Playback UI Design
Quick Search & Playback

This DVR series is all capable of full-channel real-time recording to capture fluent images, and it's getting even easier to search those videos with the new playback panel. All filter options are laid in one interface for you to quickly select and find the time segment with recordings.
